PROFESSIONAL SUMMARY

Hardworking and enthusiastic **Software Engineer**, currently working as a **Python/Django** developer at **Open Drawing**. Specializing in **Python backend development and AI integrations**, with professional experience building scalable web applications, REST APIs, data-processing systems, payment workflows, user management systems, and automation pipelines, integrating AI tools and building reliable backend services.

EXPERIENCE

Python/Django Developer — [OpenDrawing](#) [Oct 2025 – Present]

- Built backend systems for data processing, reporting, payments, quotas, and user management using Python-based technologies.
- Developed a **data-processing engine** supporting multiple file formats, dynamic field configuration, field mapping, incremental updates, and automated **CSV/PDF report generation**.
- Integrated **Stripe** for one-time payments using Checkout Sessions and webhooks, including quota, coupon, billing-period rollover, and resource-provisioning workflows.
- Developed **RBAC and multi-tenant organization management** with CRUD operations, user lifecycle management, audit logging, and activity tracking middleware.

Associate Software Engineer — [Linked Matrix](#) [Sep 2024 – Sep 2025]

- Developed backend features using **Python, Django, Flask, FastAPI, REST APIs, and databases**.
- Built web-scraping and automation pipelines using **Scrapy, Selenium, Playwright, Zyte** for dynamic and protected websites.
- Developed scalable **Apify actors** for scraping and automation workflows.
- Wrote Python automation scripts and **AWS Lambda functions** to streamline repetitive workflows and automate job-application processes.
- Built the **ReHub backend** using FastAPI and Supabase, providing secure HTTP endpoints for **Vapi AI tools**.

Backend Development Intern — [Linked Matrix](#) [June 2024 – Aug 2024]

- Learned and applied **Python, Django, Flask, REST APIs, and backend development** through practical projects and exercises.
- Built web-scraping projects, including an **Instagram scraper** and a **Kenosha scraper**, gaining practical experience with Python scraping and automation.

Frontend Development Intern — [Burnt Brains](#) [Mar 2024 – May 2024]

- Learned and applied the **MERN stack**, including JavaScript, React, HTML, CSS, and related frontend technologies.
- Contributed to the development of the company's website by implementing frontend interfaces based on provided designs.

PROJECTS

[Dreamframe](#) — AI Dream Journal | Python, Flask, Postgresql, JavaScript, Vercel

- Built and deployed a full-stack Flask web app that turns journal entries into AI-generated 3-panel comics, with user auth, SQLite/Postgres persistence, and a Jinja/vanilla-JS frontend.
- Integrated free-tier LLM and image-generation APIs (Groq, Pollinations) with custom retry/backoff and per-panel regeneration to handle real-world rate limits gracefully.

SKILLS

- **Languages:** Python, JavaScript
- **Backend:** Django, DRF, FastAPI, Flask, REST APIs
- **AI & Integrations:** AI/LLM APIs, Vapi AI
- **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB, Supabase, Neo4j
- **Tools:** Git, GitHub, Postman, VS Code, PyCharm, Cursor, Claude
- **Cloud & Infrastructure:** AWS, AWS Lambda, Apify, Docker
- **Web Scraping & Automation:** Scrapy, Selenium, Playwright, Zyte, ZenRows, BeautifulSoup
- **Frontend:** React.js, HTML, CSS, Tailwind CSS

EDUCATION

BSc Electrical Engineering(CS)
MERN full stack Web Development Course

Oct 2020 - May 2024
June 2023 - Nov 2023
